

Specialist Cleaning: Kitchen Canopies

The commercial kitchen canopy's job is to absorb smoke, fat, oils, poisonous carbon monoxide gases, as well as odours and chemical particles...to prevent the people in your kitchen from doing so...

We clean your canopy inside out to ensure:

1

Effectiveness over time

2

Appearance over time

3

Carbon monoxide gases and grease elements in the air are removed to the level required by OHS standards

Our comprehensive canopy cleaning service

Avoid the build-up of fat residues and blocked air inlets which lead to loss of efficiency and increased risk of fire

Ensure sufficient air for complete combustion at fired appliances and prevent the risk of carbon monoxide accumulating

Ensure that the air movement in the kitchen does not cause discomfort to kitchen workers

Remove cooking fumes at the source, i.e. as close to the cooking equipment as possible

Upon completion, we provide you with a certificate detailing the service provided to ensure your peace of mind and compliance to industry standards

Remove excess hot air and introduce incoming cool air so that a comfortable environment is achieved

Specialist Cleaning: Kitchen Deep Clean

For the safe preparation, handling, and serving of food, your commercial kitchen needs to comply to rigorous Health & Safety standards.

We deep clean your kitchen thoroughly, safely and systematically

- 1 All electrical items are isolated and exposed switches covered with a waterproof tape or polythene cover
- 2 All Kitchen Equipment, where practical, are dismantled, cleaned, sanitised and re-assembled by trained operatives
- 3 Where possible, equipment is pulled out to ensure that thorough cleaning can be achieved both beneath and behind the equipment
- 4 Mechanical and chemical cleaning are applied (green option available)
- 5 Walls and ceilings are normally steam cleaned, before the equipment is returned into position
- 6 Cooking and preparation areas are sanitised
- 7 Floor areas are thoroughly cleaned with use of a floor scrubber, steam cleaner and wet dry vacuum cleaner
- 8 Skirtings, corners, pipework, legs and wheels are inspected and re-cleaned if necessary, all rubbish and debris is removed and area is tidied

Kitchen structure (ceilings, vents, walls and floors) | Ovens - gas or electric | Deep fat fryers | Kitchen canopies | Filters | Fat traps | Griddle plates, Grills and char-grills | Hot / cold food preparation areas | Walk-in refrigerators, Standard fridges and freezers | Catering equipment
